Weapons Of Math Destruction: How Big Data Increases Inequality A Crack

Title: Weapons of Math Destruction: How Big Data Increases Inequality a crack . Title: Weapons of Math Destruction: How Big Data Increases Inequality and Threatens Democracy - Cathy O'Neil. Can you please. A: The server does not allow me to comment from my phone so I will leave this as a link only answer. As I read your post, it seems that we are not talking about the same thing. It appears that your server has found your post to be a duplicate based on the part of the post it does not like: As these cases happen over and over, it is a question of whether the policy and enforcement of the policy are fundamentally broken or merely inept. This seems to be a question of whether the policy is broken as it is applied to you. Other people have pointed out that this is similar to a question that would be asked about, say, Medicare. Can Medicare be applied fairly across the board or is it fundamentally broken? And this is a very common type of question on Stack Exchange, so you are not unique in having this one. You should not be downvoted for bringing up an example that is a common question that would be asked across the network. It is important to note that questions about one particular program (Medicare) are not duplicate when you apply the same program to different people. If you bring up an example of a common question about one specific program, that is not a duplicate of a question about another program. If you bring up a common question about a specific program, that does not mean that the other program has a similar enough question that it is a duplicate of the other one. A: I think you are giving too much weight to minor themes that are not present in your repost. You repost a highly rated question and drastically modify it (by adding an unrelated section that is not present in the original content). You demand that moderation: A) Review a question that someone else already answered correctly and B) Moderator review a question that you deliberately obfuscated. (For example, your real question was "Does one have access to the data used to update a PROD database when reporting a violation of EPC?". You obfuscated that by adding an irrelevant subject in the formatting.) Recommendation: It would be best if you could refrain from reposting questions. You could then be rewarded e79caf774b

Weapons of Math Destruction: How Big Data Increases Inequality and Threatens Democracy by O'Neil, Cathy. Book - 2016. Cathy O'Neil has a PhD in mathematics and works as a data scientist in New.
