CAD standards for Industry Foundation Classes (IFC) and Building Information Modeling (BIM) The IFC standards are a subset of the Open Structured Data Exchange (OSDX) set of Industry Foundation Classes. In the near future, it is foreseen that IFC will become the basis for the BIM CAD standards. IFC has been developed and applied by the U.S. Department of Transportation in collaboration with AIA and ISO. IFC integrates information about the process of a construction project, from the big picture to the details of the construction work. BIM CAD is an industry standard, which supports standardization of the data exchange format used by CAD and BIM tools. BIM CAD is a component of the BIM platform, and the future exchange format of BIM CAD is based on the IFC standard. File formats AutoCAD Cracked 2022 Latest Version does not natively support the majority of file formats, with most applications needing to convert the file format to a supported one. An application may include a capability to save and edit any file format. The most important file format are the dxf (drafting exchange) format, dwg (drawing) format, vtk, mae and several others. The dwg and vtk format are a result of the dxf application and dwg application on a vector graphics editor and dxf writer, respectively, by Autodesk. The dxf application includes the dwg format in addition to dxf, and the dwg application includes the vtk format in addition to dwg. Versions The application version also differs based on the operating system and hardware. There are three different versions of AutoCAD: AutoCAD LT, the entry-level version.
