CHICAGO — Kanye West left his on-again, off-again relationship with ex-girlfriend and wife Kim Kardashian for the third time in two years on Tuesday night, leaving the reality TV star's publicist to write on Twitter that "there are no hard feelings and we love each other very much." The artists sat down for an hour-long interview during a promotional visit to Chicago at the city's annual Lollapalooza music festival. While West was careful to joke he hadn't changed in any way — although he insisted he had — he said, "I've always liked her personality. I've always seen the light and I always felt like she could do great things." 'Life's what you make it' West, 40, didn't divulge any new personal details about their relationship, saying, "I really don't want to go into the past and give too much away." He said it was a "special" moment, adding, "Life's what you make it." "I'm not with anybody right now," he said. Asked what he wants to do next, he said, "Obviously I want to make music. Obviously I want to make movies." West, who showed up at Lollapalooza wearing a T-shirt emblazoned with the words "God Is God," had his own surprise in store when his right-hand man and real-life best friend, a British DJ named Paul, took the stage. He brought along DJ Tony Yayo, who sat in on the performance. Yayo had just been released from prison, where he spent a year for violating probation. "I feel very grateful to be here with my boy," Yayo said as he gave West a warm hug. "Come back to Chicago, Kanye. We love you, man. It's been a long time, but here we are." On the line from his publicist, West said, "I haven't seen you since you were in prison, Tony." Read more Kanye West tells John Legend to 'wake the f--- up and smell the roses' For the performance, the pair played West's new song, "Streetlights" — much of which is a dialogue between the two on the
