## HACK Norton 360 Key

Battery Drains Quickly: If your phone usage habits remain the same, but your battery is draining faster than usual, a hack may be to blame. As with any hack, it can depend on two things: hardware and software. Hardware Many smartphones are equipped with a battery that keeps the device running whether or not it is on when it is charging. This mechanism is called "active mode" (AKM). When the battery is activated, the battery level will be shown on the display. Once the battery reaches 100%, Active Mode is disabled. dd2bc28256
