- "Foobar XML format" add-in support.
- Support for Microsoft Visio 2007.
- Fixed a bug: a custom element's decimal field was not updating the decimal precision value.
- Fixed a bug: an element attribute was not saved after clicking "Apply".
- Fixed a bug: the option to display the current clock value was not available on Windows 95/98.
- Fixed a bug: a "Refresh" button was visible even if the document wasn't fully loaded.
- Fixed a bug: the attribute "Reference" was not displayed for non-date elements.
- Fixed a bug: a few components were misplaced after a recent update.
- Fixed a bug: the "Print" button was active even if the print preview was not displayed.
- Updated the component content: a large number of components have been updated in terms of their layout and appearance.
- Supported Microsoft Windows 2000/XP/Vista/7.
- Improved the "Tracking" feature.
- The "Print" dialog was updated: it now shows the date on the top right corner instead of "today" and the "Next Page" button is now grayed out.
- The design of the project and event components was updated.
- The "Foobar XML format" add-in was redesigned.
- Fixed a bug: the user interface was partially displayed in a zoomed version.
- Fixed a bug: the component "Prints" in a project was displaying the wrong properties.
- Fixed a bug: the program was unable to stop after finishing a project.
- Fixed a bug: the scroll bar was not displayed when the user switched between list views and columns.
- Fixed a bug: the "Refresh" button in the "First Page" dialog was not displayed when the preview was hidden.
- Fixed a bug: the "Find" dialog had a focus problem when clicking on a table cell.
